

ASPiON ■ G-Log 2

Transport Data Logger

Recording shocks and climate during transport

Wireless. Inexpensive. Long lasting.

First data logger to monitor the shipment of goods in accordance with standard

IEC 60721-3-2

Transparency and security in the supply chain

Your benefits:

- Reliably records shocks and climatic conditions during transport
- Comprehensible: when was the transported good exposed to which impacts and conditions?
- Transparency according to standard with shock/vibration test
- Provides evidence for transport service providers, customers and insurance companies

ASPiON

Starter package €289

plus VAT and shipping

ASPiON ■ G-Log 2

Shock and climate data logger

Awarded with:

INNOVATION AWARDS BW 2021

Powerful sensor technology

- Precise 3-axis recording of shocks with up to ± 24 g per axis
- Shock/vibration test according to IEC 60721-3-2
- Additional exact shock curve in milliseconds
- Factory calibrated sensors over the entire operating life
- Position visualisation via gravitational force
- Logging of temperature and relative humidity
- Freely selectable threshold values

Easy handling and sustainability

- Permanent memory for event recording
- Compact ABS housing IP 50 or IP 65/67, easy to mount
- Wireless data transmission via NFC and BLE
- Individually configurable, universally applicable
- Long battery life and long shelf life
- Replaceable battery, not subject to labelling
- Approved for air freight
- Market-leading price/performance ratio

PC software for Windows

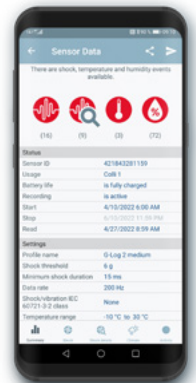

- Wireless operation of the data loggers via BLE and NFC with USB card reader
- Numerous functions: start/stop time-controlled, profile settings, shipment assignment, runtime check, meaningful evaluations, various export formats, etc.
- Multi-site operation with comprehensive options for configuration and application
- Easy to operate

Smartphone app for iOS and Android

- Wireless multi-readout via BLE, also through packaging
- Live view for climate values and battery capacity
- Evaluation by traffic light function and in detail
- Sending of evaluations by e-mail or automatically via cloud transfer
- Tamper resistance and simple operation

Including royalty-free PC software and app in multiple languages

Waterproof version available
