

ASPiON L-Track Global Network Coverage

The following table shows an overview of the countries and regions in which the L-Track has network coverage. In countries without network coverage, no connection to the ASPiON Cloud can be established. In this case, the data is stored on the device until a connection can be established in a region with network coverage.

Some countries do not allow permanent roaming. This means that the connection can be suspended during a longer stay until the L-Track is in another region. Usually a period of 90 days is possible without restrictions.

Country	Network Coverage	Permanent roaming restrictions
Afghanistan	✓	
Albania	✓	
Algeria	✓	
Andorra	✓	
Angola
